PROFESSIONAL SUMMARY

Dedicated Mobile Engineer specializing in **Flutter** with 1.5 years of hands-on experience taking cross-platform applications from concept to production. Passionate about writing clean, maintainable code and delivering seamless user experiences. Actively seeking an opportunity to join a collaborative engineering team under strong technical mentorship to refine architectural skills, contribute to high-impact products, and accelerate growth toward a **Senior Developer** role.

TECHNICAL SKILLS

- **Architecture & Core Principles:** Clean Architecture, SOLID, MVVM, MVC, Functional Programming (**Dartz**), Object-Oriented Programming (Dart, Python, C#).
- **State Management: BLoC/Cubit (Expert) with Freezed** (for immutable states), GetX, Provider.
- **DevOps, CI/CD & Distribution:** CI/CD Pipelines (**GitHub Actions, Fastlane**), **Firebase App Distribution**, **Shorebird** (OTA Code Push),TestFlight, Google Play Console, App Store Connect. **App Flavors** (Environment Management).
- **Real-Time & Complex Systems:** Custom VoIP & Video Modules **(Zego Cloud(Expert)**,Agora Engine , Get Stream , JitSi), WebSockets, Stream.io, Synchronized Canvas Engineering.
- **API & Network Engineering:** RESTful APIs, Error Handling Strategies, JSON Serialization.
- **Testing:** Unit Testing, Widget Testing, Integration Testing.
- **Databases & Persistence:** SQFlite, Hive, Shared Preferences, SQL.

PROFESSIONAL EXPERIENCE

Junior Flutter Developer | Focal Point

- **Real-Time Communication:** Engineered robust communication suites for flagship applications, customizing audio/video calling and interactive real-time tools (zego cloud , jitsi, agora, get stream) for high-concurrency environments.
- **Streamlined Release Engineering:** Engineered a robust CI/CD ecosystem using **GitHub Actions**, **Fastlane**, and **Shorebird** to automate deployment pipelines, reducing manual overhead and enabling instant over-the-air (OTA) production hotfixes that bypass traditional App Store approval cycles.

Junior Flutter Developer | Lepgo

- Directed the development and feature expansion of the **Lepgo** marketplace mobile application on the Google Play Store.
- Collaborated with UI/UX teams to implement responsive, high-fidelity designs ensuring platform-specific consistency across Android and iOS devices.

Freelance Flutter Developer

- Developed a high-complexity medical application featuring **Machine Learning** integration for specialized diagnostic tools.

- Managed the full software development life cycle (SDLC), including complex local data persistence and real-time API synchronization.

Flutter Developer Intern | Gridea

- Developed feature-rich mobile applications using advanced state management patterns including **GetX** and **Provider**.
- Participated in technical code reviews and optimized application performance for low-end hardware.

KEY PROJECTS

- **Jeras (غراس) | iOS, Android & Web:** Developed a high-fidelity communication engine featuring customized video calling and an integrated interactive whiteboard for real-time collaboration.
- **Make My Nikah | iOS & Android:** Engineered a synchronized canvas engine for in-call data exchange, focusing on low-latency state synchronization and high-concurrency stability.
- **Dream (رؤية) | iOS & Android:** Architected a secure, high-fidelity VoIP platform for private consultations, incorporating real-time workspaces and advanced notification frameworks.
- **Rob3 Gram & Sales Suite:**(Demo1,Demo2 ,Demo3) Developed ML-powered medical detection applications and a dual-app ecosystem for sales force automation and administrative oversight.
- **Lepgo app** In Google Play : Responsible for the development and ongoing maintenance of the company's primary mobile application .
- **Cli Tech | AI-Powered Clinic Management Solution : (Demo)** Engineered a secure management ecosystem for healthcare practitioners to remotely oversee clinic workflows, Utilizing integrated AI models to assist in data categorization and operational decision-making.

SOFT SKILLS

- **Analytical Problem Solving:** Strong ability to break down complex system requirements into scalable, logical code structures.
- **Continuous Learning & Adaptability:** Highly adaptable to new technologies, seamlessly bridging mobile development (Flutter) with emerging fields like Machine Learning and AI.
- **Technical Communication:** Capable of translating complex technical constraints into clear business language for stakeholders and non-technical team members.
- **Agile Collaboration:** Experience working within fast-paced environments, prioritizing tasks, and delivering high-quality modules under tight deadlines.

EDUCATION

Bachelor of Science in Computer Science & Information Systems *Faculty of Computers and Information (FCIS), Mansoura University (2024)*

LANGUAGES

- **Arabic:** Native
- **English:** Professional Working Proficiency
